

Intrusive Behaviour Risk Analysis & Mitigation

RISK MANAGEMENT AND SECURITY SERVICES

Would you know what to do if a member of your family or firm was receiving unwanted and unsolicited attention?

With the only multidisciplinary team of its kind in the UK and Europe, SRG Special Projects is uniquely placed to deliver intrusive behaviour risk analysis services globally to Corporations, HNW, Family Offices, PR & Talent Agents, as well as Sports, Media, Music and Arts sectors

A sustained campaign of intrusive and unwanted behaviour can seriously affect an individual's physical and mental health.

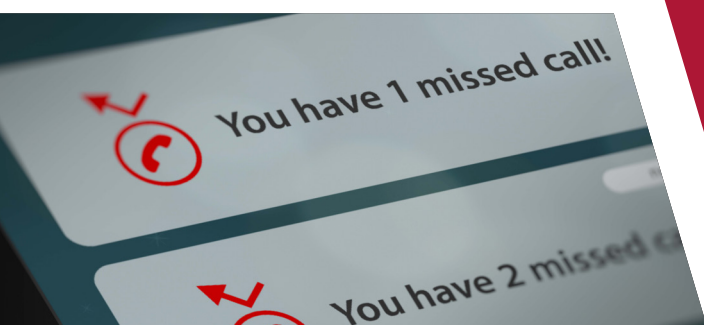

And most people are unable to identify the warning signs that indicate an escalating or more threatening pattern of behaviour that warrants more immediate intervention.

Our unique knowledge and casework experience provide that specialist risk analysis and mitigation to bring these situations to a successful resolution.

Studies show that more than 60% of individuals harassing and approaching public figures suffer from serious psychiatric disorders.

And while most do not represent a physical threat to the subject of their attentions, the persistent activity can cause fear, frustration, anger and major disruption in the life of the victim.

We work with a team of specialist behavioural investigative psychologists to look at the motivations and dynamics driving such behaviour to ensure the safest route to resolution.

SRG Special Projects

Our team has developed integrated services designed to identify, develop, and implement comprehensive protection strategies for a range of potential threats, including:

- Threatening and abusive behaviour, emails, tweets, LinkedIn posts and more
- Homophobic and misogynist commentary
- Unsolicited letters
- Physical approaches
- Unwanted gifts
- Damage to property
- Anonymous contact
- Demands and extortion
- Harassment and intimidation
- Stalking
- False allegations

We are uniquely placed to provide assistance and reassurance as we have spent years developing an outstanding specialist team to ensure wrap around care, assessment, mitigation and resolution.
